

ATLANTA BUILDER **JOHN BEACH** OF PACES CONSTRUCTION, DORSEY ALSTON EXCLUSIVE LISTING AGENT **ANNE MORRIS** AND DORSEY ALSTON PRESIDENT **JODY ABSTANCE** STAND IN THE DRIVEWAY OF THE 1930s HOME, THE LARGEST RENOVATED HOUSE TO ACHIEVE EARTHCRAFT CERTIFICATION SINCE THE PROGRAM WAS INITIATED.

Earthcraft Home

When Atlanta builder John Beach, partner of Paces Construction, embarked upon transforming a charming, elegantly designed 1930s Buckhead residence into a “green house,” he undertook the first such renovation of a luxury home in the city. His meticulous attention to detail and adherence to every aspect of environmental protection led him to complete almost 200 points of the Earthcraft certification program, 60 points above the requirement. According to Earthcraft, the home at 3060 West Pine Valley Road, just off Argonne and Habersham Roads, is the largest renovated house to achieve certification since the program was initiated. “John Beach has creatively updated this fine home to exceed the expectations of today’s luxury home buyer and has provided this and future three or four generations with a green home incorporating the best in energy and environmental efficiency” said Jody Abstance, president of Dorsey Alston Realtors.
